T-B&S Manufacturing Company was started by Joyce and Allen Barrett in 1980 with just a few manual tools, 1 employee, and providing assistance to other machine shops with their workload and schedules. After a few years of hard work, dedication to quality, and outstanding customer service, the company moved to a stand alone facility in Haltom City. As business grew and more contracts were awarded, we decided to build a facility around the corner and add new equipment and capabilities to our processing. Robert Berkner (son of Joyce and Allen) was hired to assist with running of the business and within a short time, our increase in capabilities and resources allowed us to manufacture large diameter tube assemblies and offer our customers higher levels of quality and shorter lead times.

Today, we operate with the newest tube bending, precision machining, and sheet metal fabrication equipment available in the market. We specialize in all sizes of lot quantities and maintain complete traceability for the products we manufacture and sell.
